

Enhancement of Postgraduate Studies on Sustainable Agriculture and Future Farming Systems

Qualifying academic professionals increases the capability for knowledge based solutions in sustainable agriculture and for improved farming systems. Therefore the project partnership aims to:

- develop and establish post-graduate modules to train doctoral students on inter- and trans-disciplinary contents and approaches relevant for agricultural research and innovation.
- increase institutional capacities for doctoral education based on international standards and best-practices.
- strengthen international and inter-regional academic exchange and research cooperation of Russian and Kazakh agricultural higher education.
- establish a network on doctoral research and education in the agricultural field targeted on the exchange of best practices with a wider audience.
